

Nozomi Networks at a Glance

Elevator Pitch

Only Nozomi Networks offers highly-accurate, actionable intelligence and protection for integrated OT and IoT security at scale. The detailed visibility and in-depth insight we deliver allows organizations to anticipate, diagnose and respond to security and operational risks, and improve processes for maximum resilience.

Anticipate Problems

Unparalleled OT and IoT visibility helps you foresee potential security and reliability threats long before they impact operations.

Diagnose Threats

We go beyond OT and IoT anomaly detection to help you diagnose the root causes of unexpected process changes and deviations from baseline behavior.

Respond Quickly

Actionable intelligence and guided remediation provide the insight you need to accelerate your response to critical OT and IoT security breaches and process control issues.

AWARDS AND RECOGNITION

Key Questions

1. Do you have an OT/ICS network or IoT devices in your OT networks?
2. Who handles your OT or IoT network security?
3. Do you have centralized security management across your OT and IT networks?
4. How much does it cost if you go off-line unexpectedly?
5. How long could you be down before your business would start to suffer?

Nozomi Networks by the Numbers

Professionals

Global Network

of SI, VAR and
Distribution Partners

A Comprehensive Security Solution

PRODUCT
Guardian

Industrial strength OT and IoT security and visibility

SUBSCRIPTION
Asset Intelligence

Focus on the OT and IoT incidents that matter

ADD-ON
Remote Collectors

Low resource appliances for distant and distributed locations

Nozomi Networks Labs
Threat Advisories, Tools, Reports, Projects, etc.

SAAS
Vantage

SaaS-powered security and visibility of OT and IoT networks

SUBSCRIPTION
Threat Intelligence

Detect emerging OT and IoT threats and vulnerabilities

ADD-ON
Smart Polling

Identify non-communicating assets and rogue devices

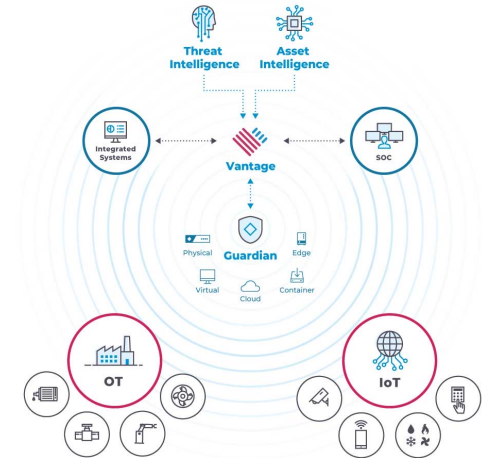

Service Offerings
Certified Engineer Training, Professional Services, Customer Support

PRODUCT
Central Management Console

Centralized OT and IoT security and visibility for distributed sites

PHYSICAL APPLIANCES

Protect up to
500,000 nodes

Up to 6 Gbps
Throughput

VIRTUAL APPLIANCES

Protect up to
40,000 nodes

Up to 1 Gbps
Throughput

CONTAINER EDITION

Embedded appliances for switches, routers & other security infrastructure

Available for Guardian with the Smart Polling add-on only

CMC CLOUD APPLIANCES

Unlimited max. managed appliances*

100+ Gb storage

*based on the infrastructure
