

Multi-Cloud Management with Morpheus

Manage Hybrid Clouds and Modernize Applications

Executive Summary

Multi-Cloud Management with Morpheus on Dell EMC VxRail offers service providers a validated cloud brokerage and automation platform that enables them to provide their infrastructure as-a-Service, access 3rd party cloud services and offer full application lifecycle management.

SP Solution Spotlight

Morpheus is a powerful self-service and automation engine that provides enterprise agility, control and efficiency. Quickly enable on-prem private clouds, centralize public cloud access and enable change with cost analytics and governance policy.

Key Takeaways

What are the benefits?

70%¹

Faster release speed through cloud automation¹

400%¹

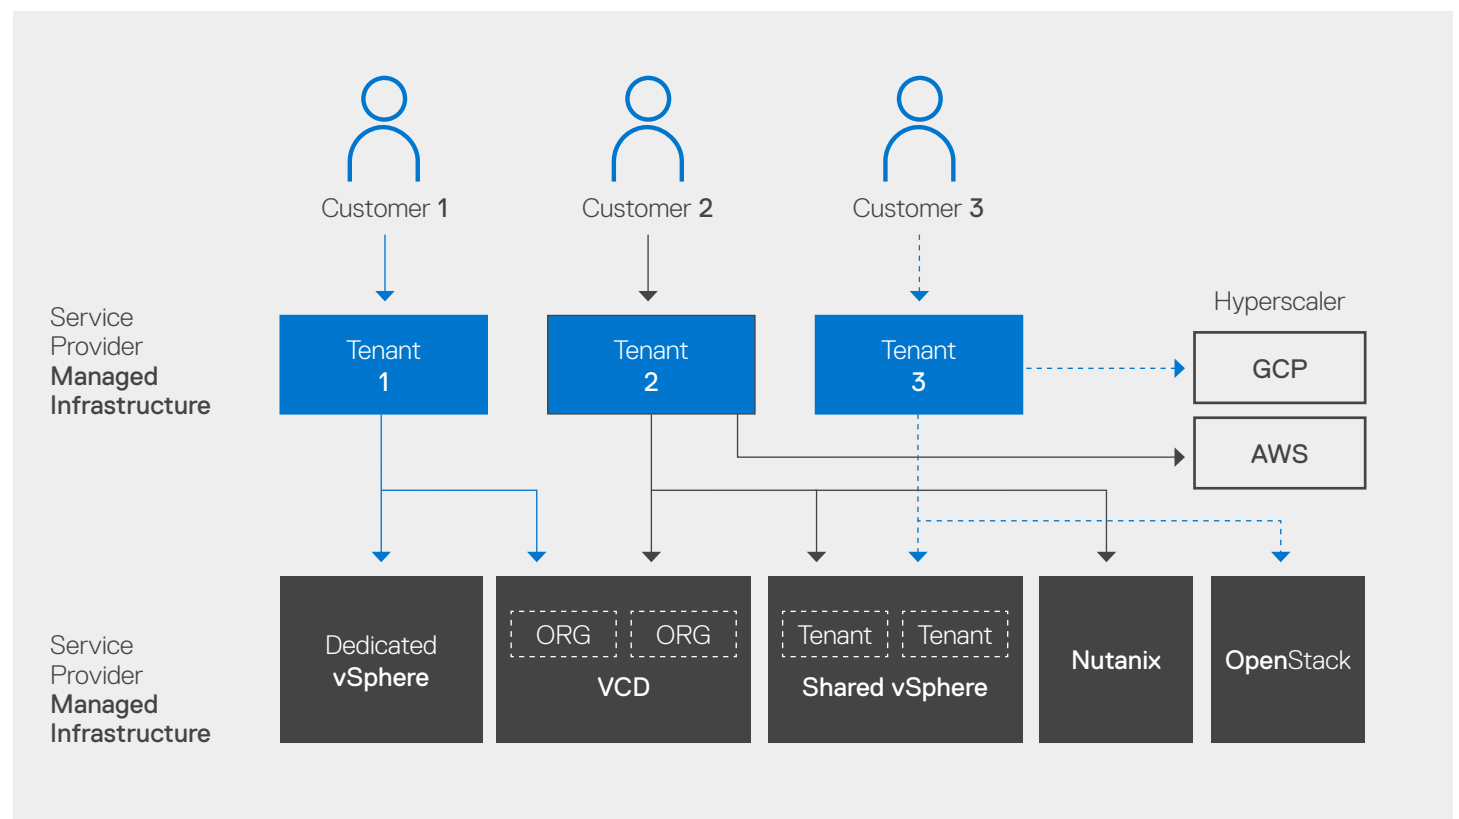

More software features released when using a CMP¹

90%²

Of companies won't scale DevOps tasks without CMP²

60%³

More efficient provider infrastructure on VxRail³

Solution Spotlight

This solution is a multi-tenant hybrid cloud management platform that enables service providers to differentiate themselves with a unified approach to self-service application provisioning, governance and brokerage across private, hosted and public clouds.

SP Features	Dell Technologies
Vendor Agnostic	This solution offers a vendor-agnostic cloud management platform.
Automation Integration	The solution integrates with automation and configuration management systems, including Ansible, Terraform, Chef, Puppet, Salt and VMware vRealize Orchestrator.
Multi-Cloud	This solution has more native cloud integrations than any other cloud management platform, including all hyperscalers, Hyper-V, KVM, Nutanix, OpenStack and VMware.
ITSM Integration	Morpheus integrates natively with existing CMDB/ITSM tools such as ServiceNow, Cherwell and Remedy.
API First	The Morpheus CMP is API first and integrates well with service providers existing tools and systems. Morpheus offers a full CLI and Web-UI as well.
Governance	Morpheus provides full RBAC, multi-tenancy and policy engine based on various levels (user, group, role, cloud, etc). This provides enhanced governance.
Production	Simplify operations such as scaling, monitoring, logging, backup and day 2 task execution.
Analyze	Reporting, dashboards, rightsizing and more. All part of the Morpheus platform.

Why choose Dell Technologies?

Time to Market

Faster time to market with a validated solution.

Partnering for Success

Global Alliances partner program – designed to drive your success.

Unlock Innovation

56% faster IT service delivery with VxRail¹.

Operational Freedom

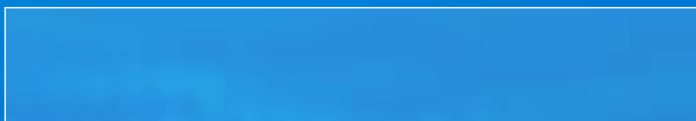

Up to 489% 5-year ROI on VxRail's simplified operations and reduced risk¹.

Multiple Use Cases

A single platform for multiple server provider use cases.
